

Decoder routing summary by layer — T5-small SCAN add_prim_jump

Source: S-049 (S-049_DECODER_XATTN_V0.1.0). Summary statistics only; raw attention matrices not available.
Routing profiles nearly identical in fail and success cases (K1: routing is not the primary discriminator in this comparison).

(A) Per-layer attention weight profile
Fail vs. success — similar across all layers

(B) h1: mean attention comparison
p = 0.9208 (NS) — routing statistically identical
